

I also agree with Petition number RM-10787, filed by the NCVEC, pertaining to eliminating the CW requirement. As I stated in my comments about RM-10784, RM-10787 is also a good proposal for access to the HF bands on Ham Radio.

When I retested for CW (ONCE AGAIN, for the 8th time) in August, 2003; at that point in time, I'd given almost 1 YEAR to studying the code.

By eliminating the CW requirement for the HF bands, it'll give MANY Technician Class operators the incentive to advance to General Class and FINALLY be able to keep the Amateur Service going for MANY, MANY years to come.

PLZ take this opportunity to realize the benefits of eliminating the CW requirement for access to the HF bands.
